

**HOVERBOARD-SET** instruction manual:

### The **HOVERBOARD-SET** Information About Use:

The **HOVERBOARD-SET** comes as a complete kit, and it can be attached easily, using the supplied stickers beneath a conventional skateboard deck ( without wheels ). That's it! The new **HOVERBOARD** hovers henceforth forever, driven only by the integrated perpetual motion technology ( patent pending ), for an absolutely free hover flight experience with no running costs. No battery charging or power cable needed! The power is built-in onboard! The hovering is as easy like driving a usual skateboard with wheels. The silent and friction-less anti-gravity **HOVERBOARD-SET** hovers on its gliding hover-skids at a hover flight height of 0.23 cm over any dry or wet surfaces on the natural electrostatic earth-field, it hovers on street, sand, grass, snow, ice, it hovers over solid ground and also over water, over curbs as well as over gravel and stones, it even hovers over the beach and over more surfaces ...

### The **HOVERBOARD-SET** Instructions To Use:

1. **One-Size-Fits-All:** Take a conventional ( wheelless ) skateboard deck of your own choice.
2. Place the **HOVERBOARD-SET** module with 4 adhesive pads, and the hover-wires with another 4 adhesive pads as a three-sided square on the bottom-side of the board. It should look like as shown in the picture beneath.

3. **Jump on your brand new hoverboard! Be careful: it has no brakes! Hover carefully - others may won't!**

### Electric Safety Of The **HOVERBOARD-SET**:

Body contact is safe, the wiring can be touched without any danger. IP68 = Full contact protection, protection against dust penetration + Protected against penetrating water when immersed for undetermined time.
